

5s

5S Training teaches participants how to organize and standardize the workplace to improve efficiency, safety, and quality. Our 5S training programs provide the foundational tools necessary to optimize workplace efficiency and foster a culture of continuous improvement.

5S training includes hands-on learning; participants will learn to sort, set in order, shine, standardize, and sustain work areas, creating a clean and organized environment. The course equips teams with practical skills to reduce waste, streamline processes, and maintain consistent, high-performing operations.

Participants Will:

Learn the 5s system

- SORT through what you have and remove what you don't need
- SET IN ORDER what remains, making space visual and self-explanatory
- SHINE up tools, equipment and workspaces, keeping them spotless
- STANDARDIZE and follow work rules scrupulously
- SUSTAIN by maintaining the discipline in 5S
- Understand how to create a visual management system in your workplace

Topics Covered:

- Creating a stable, consistent, predictable workplace
- Addressing and implementing each of the 5S, in chronological order
- Integrating safety into each of the 5S's
- Implementing a visual management system that allows one to differentiate normal conditions from abnormal almost immediately
- Importance of sustainment in 5S efforts

We Can Help.

- Advanced Manufacturing & Technology Deployment
- Business Growth, Innovation & Marketing
- Business & Operational Assessments
- Cybersecurity Strategies
- Defense Industry Initiatives
- Environment, Energy & Sustainability Services
- Evaluation Services & Resource Development
- Industrial & Systems Engineering
- Instructional Design
- Leadership & Organizational Development
- Management Systems & Quality
- Process Optimization & LEAN
- Project Management
- Southeastern OSHA Training Institute Education Center
- Supply Chain & Supplier Matching
- Workplace Health & Safety

Duration:

- 7-8 Hours | 1 Day (training class)
- 21-24 Hours - 3 Days (implementation kaizen)

Format:

- Customized on-site, in-person instruction

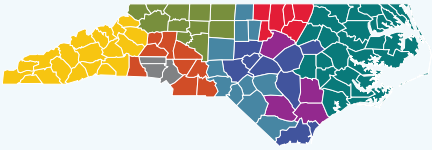

Recommended For:

Anyone with a desire to improve a work area or office area with continuous improvement tools to improve flow and create a visual work system including office managers, supervisors, lead operators, industrial/manufacturing engineers, and quality managers.
